

WAT (weekly group meeting) of the Landscape Ecology
Group
Thursdays, 10:15 – 11:45, in W2 2-243

All group members including students doing their thesis within our group are requested to join the seminar. Students and other interested guests are warmly welcome!

WS 2011/2012

date	name	theme
01.12.2011	David Schellenberger-Costa	Plant trait composition of unused and used vegetation at the foothills of Mt. Kilimanjaro.
08.12.2011	Kerstin Menke	Vertragsnaturschutz für Wiesenvögel im Weser-Ems-Raum
15.12.2011		no seminar
19.01.2012	Celia Grande	Plant-bird interactions in grasslands and reed beds
26.01.2012		no seminar
02.02.2012	Monique de Lauwere	The biota of the Swartkops Solar Saltworks and the potential for producing useful products
	Barbara Raufer	Populationsökologische Untersuchungen an Arten eutropher Laubwälder
09.02.2012	Silke Eilers, Juliane Trinogga, Miguel Cebrian	COMTESS project WP3 Plant traits, vegetation based ecosystem functions and services (including a detailed discussion on each of the three PhD projects)
16.02.2012	Maria Briede	Populationsökologische Untersuchungen an <i>Juniperus communis</i> ssp. <i>nana</i> auf North Harris (Schottland)
	Frauke Maiwald	Habitatansprüche von <i>Juniperus communis</i> ssp. <i>nana</i> auf North Harris (Schottland)
23.02.2012	Martin Maier	Plant-animal interactions on salt marshes.
	Heiko Behrens (Uni Bremen)	The influence of nest markers on the daily predation rate of artificial ground-nests.

Michael Kleyer, Julia Stahl
